DOUGLAS LABORATORIES EARNS NSF REGISTRATION FOR GMP EXCELLENCE

Pittsburgh, PA — Douglas Laboratories has earned the NSF Good Manufacturing Practices (GMP) registration for its vitamin and nutritional supplement production facilities.

Founded in 1944, NSF is a non-profit, global leader in standards development, product certification, education and risk-management services. NSF is widely respected for its scientific and technical expertise in public health and safety and environmental sciences.

NSF conducted an independent audit of Douglas Laboratories' 150,000 square foot manufacturing, packaging and distribution center in Pittsburgh, Pennsylvania. In the audit, NSF verified that Douglas Laboratories complied with its GMP guidelines, which provide a system of processes, procedures and documentation to assure the products produced have the identity, strength, composition, quality and purity that the company claims.

"For more than 50 years, Douglas Laboratories has been a trusted source for healthcare practitioners providing nutritional supplements that are high-quality, safe and beneficial for patients," said Doug Lioon, CEO of Douglas Laboratories. "We are honored that our manufacturing practices have been recognized by NSF, an association that shares our same commitment to public health and safety."

For complying with the requirements of the NSF GMP program, Douglas Laboratories has been issued a certificate and is listed on the NSF website at www.nsf.org. Douglas Laboratories is also entitled to use the NSF mark, which is recognized for its value in international trade around the world and is respected by regulatory agencies at the local, state and federal levels.

Douglas Laboratories, part of the Atrium Innovations Inc. family of companies, distributes globally, with worldwide headquarters located in Pittsburgh, Pennsylvania, USA. Currently, approximately 700 branded products are offered along with new products introduced on a continuing basis. Working with an experienced research staff of Ph.Ds and a world-renowned medical advisory board, Douglas Laboratories' commitment to bring innovative, clinically supported products to the marketplace to support patient needs is unsurpassed.
