

Douglas Laboratories® would like to share some exciting news: Atrium Innovations has received the prestigious 2016 Achievement in Science and Innovation Award from The Nutrition Business Journal®.

[Click here](#) to read the Nutrition Business Journal® Awards article.

As an Atrium Innovations Brand, we look forward to the official awards ceremony when this distinguished honor is presented at the annual **NBJ Summit**, June 13-16 in Dana Point, California.

Douglas Laboratories uses research-based ingredients to create safe, effective healthy aging and active lifestyle supplements for doctors and health-conscious consumers. We study our own products in rigorous clinical trials with top academic partners, including researching vitamin D with the University of Pittsburgh Children's Hospital, as well as unraveling the cognitive benefits of polyphenols in older adults at Laval University in Quebec. Douglas Laboratories is heavily invested in continuing to explore the relationship between nutrition and healthy aging through science and innovation.†

About Nutrition Business Journal

Nutrition Business Journal's exclusive research and editorial focus on the strategic issues of the nutrition industry has made it a leading business intelligence resource for subscribers since 1996. To purchase detailed market research reports, subscribe to the NBJ, or sign up for the NBJ's free weekly e-newsletter, please visit www.nutritionbusinessjournal.com.
